

Verbal Reasoning

Test 3

Questions Booklet

Instructions

This practice test contains **30 questions**, and you will have **19 minutes** to answer them.

You will be presented with a passage to read, and a statement about that passage. For each statement you must select one of the following answers:

True: The statement follows logically from the information contained in the passage.

False: The statement is logically false from the information contained in the passage.

Cannot Say: It is not possible to determine whether the statement is true or false without further information.

Read the passage of information thoroughly and select the correct answer from the four options. Read the question thoroughly to ensure you know what the question entails.

Try to find a time and place where you will not be interrupted during the test. When you are ready, turn to the next page and begin.

Work-related stress is one of the biggest causes of sick leave in the UK. If you've noticed you always seem to be rushing about, or miss meal breaks, take work home or don't have enough time for relaxation, seeing your family or for exercise, then you may well find yourself under stress, especially at work. There is often no single cause of work-related stress, but it can be caused by poor working conditions, long hours, relationship problems with colleagues, or lack of job security. Stress is often the result of a combination of these factors that builds up over time. Work-related stress can result in both physical problems such as headaches, muscular tension, back or neck pain, tiredness, digestive problems and sweating; or emotional problems, such as a lower sex drive, feelings of inadequacy, irritability and lack of concentration. According to recent surveys, one in six of the UK working population said their job is very stressful, and thirty percent of men said that the demands of their job interfere with their private lives.

Q1 Stress at work is often caused by relationship problems with your partner.

True

False

Cannot say

Q2 Work-related stress can result in tiredness and a lack of concentration.

True

False

Cannot say

Q3 One in six working men say their job is very stressful.

True

False

Cannot say

Q4 If you spend more time with your family, you will not suffer from stress.

True

False

Cannot say

For many years the hunt has been on to find an effective way to treat cancerous tumours using physical rather than chemical means. That hunt may now be over with the latest breakthrough made by Dr Jennifer West at Rice University in Houston, Texas. West has done tests on animals using a non-chemical procedure known as Photothermal Ablation. She injected millions of nanoparticles, which can absorb infrared light, into the animals' bloodstreams. These particles go straight to the tumours because, unlike healthy tissue, tumours have abnormal blood capillaries that will let them through. A few hours later an optical fibre is inserted into the tumour and a blast of infrared light is passed down the fibre, which heats the particles and effectively cooks the tumour.

Q5 Photothermal Ablation is the latest breakthrough in chemical treatment for cancer.

True

False

Cannot say

Q6 Nanoparticles are objects whose dimensions are measured in nanometres, or billionths of a metre.

True

False

Cannot say

Q7 Nanoparticles can absorb infrared light.

True

False

Cannot say

U3b Networks (U3b being short for the underprivileged three billion who lack internet access) is a company in Jersey set up by Greg Wyler, former owner of Rwanda's national telephone company. His company intends to provide cheap, high-speed internet access to remote areas in developing countries, which up to now has been the reserve of developed countries. Mr Wyler plans to charge \$500 per megabit per month, compared with the \$4,000 charged by existing companies. Mr Wyler has so far raised €40m from investors, but this seems like a risky investment, especially as billions were lost on similar projects in the past. So why are people investing in the hope of finding customers in the world's poorest regions? The reason is that previous projects were over-ambitious and set out to provide global coverage, whereas U3b's project is far more modest in its optimism and its services will be available only to a 100km wide corridor around the equator, which happens to cover most developing countries. It will initially use just five satellites circling 8,000km above the equator and further expansion will be determined by customer appetite.

Q8 Greg Wyler had a background in telecoms.

True

False

Cannot say

Q9 The satellites for the project will cost €8m each.

True

False

Cannot say

Q10 The majority of developing countries lie within 100km of the equator.

True

False

Cannot say

We have all heard about bullying in schools, but bullying in the workplace is a huge problem in the UK which results in nearly 19 million days of lost output per year and costs the country 6 billion pounds annually. Workplace bullying is the abuse of a position of power by one individual over another. Otherwise known as harassment, intimidation, aggression, coercive management and by other euphemisms, bullying in the workplace can take many forms involving gender, race or age. In a nutshell, workplace bullying means behaviour that is humiliating or offensive towards some individual. This kind of bullying ranges from violence to less obvious actions like deliberately ignoring a fellow worker.

Q11 Bullying in the workplace hinders UK economic output.

True

False

Cannot say

Q12 Another name for workplace bullying is coercive management.

True

False

Cannot say

Q13 Bullying in the workplace is sometimes caused by religious intolerance.

True

False

Cannot say

Q14 Deliberately ignoring a colleague is a form of bullying.

True

False

Cannot say

Nobody knows what life forms may exist outside our own planet. The search for extra-terrestrial life in the universe took a step nearer to fruition with the discovery in June of what are believed to be traces of water on the surface of Mars. Life on our planet requires water and its presence on Mars may point towards the existence of past life on the planet. The [Phoenix Mars Lander](#) robot landed on the plains of Mars on May 25th 2008, searching for signs that the Martian environment might once have been habitable to life. When it dug a ditch in the planet's surface, photos revealed small patches of bright material. Four days later those patches had disappeared, causing scientists to speculate that they were water ice that had previously been buried and which vaporised when exposed to the air. Scientists insisted that if the patches had been salt, they wouldn't have disappeared and if they had been solid carbon dioxide, then they wouldn't have vaporised.

Q15 The Phoenix Mars Lander has provided proof that life once existed on Mars.

True

False

Cannot say

Q16 Life forms on Mars require water in order to survive.

True

False

Cannot say

Q17 Since the Phoenix Mars Lander cannot excavate it is limited to surface photography.

True

False

Cannot say

Most workers in the UK over the age of 16 are legally entitled to a minimum rate of pay, called the national minimum wage. An independent body called the Low Pay Commission (LPC) each year reviews this rate and passes their recommendation to the government, who then set and enforce the rate. With few exceptions, the minimum wage is the same for all types of work and all kinds of business. The current amount for people over 22 years of age is £6.80 per hour. The rates for younger workers are less. However, the following groups are not entitled to receive the minimum wage: workers under school leaving age, the genuinely self-employed, some apprentices, au pairs, armed service personnel and voluntary workers. Also agricultural workers have a separate minimum rate of pay set by the Agricultural Wages Board.

Q18 The Low Pay Commission sets the rate of the national minimum wage.

True

False

Cannot say

Q19 The Agricultural Wages Board sets pay bands for different levels of agricultural workers

True

False

Cannot say

Q20 The lowest wage a 16 year old is entitled to is £6.80 an hour.

True

False

Cannot say

Q21 Au pairs generally receive less than the minimum wage.

True

False

Cannot say

The 2008 A level results show that 97.2% of students passed compared with 96.6% in 2007. And 25.9% gained A grades, a rise of 0.6% from the 2007 results. The number of students sitting A levels in 2008 was also up, at a record high of 827,737. This high success-rate is causing concerns in some quarters that the exams are getting easier. However the government attribute the annual change to the increased spending on schools over the period. Meanwhile the general secretary of the Association of Teachers and Lecturers, Dr Mary Bousted, has berated teaching methods in schools as spoon-feeding students to pass exams without developing the desire to continue learning or gaining the skills necessary to learn independently. Adding to the debate, the general secretary of the University and College Union, Sally Hunt, suggested it is unfair to downplay the students' results and the hard work of their teachers.

Q22 A level results have improved every year since 2006.

True

False

Cannot say

Q23 A level exams are getting easier.

True

False

Cannot say

Q24 More money was spent on schools in 2008 than in 2007.

True

False

Cannot say

International Development Secretary, Douglas Alexander, has compared sanitary conditions in developing countries today with the situation in London 150 years ago when Parliament had to be closed owing to sewage running through the streets of the capital and a stench from the River Thames – an event that has been called ‘The Great Stink’. Today more than 1 billion people living in developing countries have no toilets and 900 million have no access to clean water. Mr. Alexander’s response has been an announcement that the Department of International Development plans to build more than 50 million toilets and provide clean drinking water to more than 25 million people in developing countries over the next five years. This plan is part of the department’s broader strategy to help poor countries in Africa and Asia to better manage their water resources and fight the effects of climate change.

Q25 ‘The Great Stink’ occurred in London.

True

False

Cannot say

Q26 There are fewer than 900 million people living in developing countries.

True

False

Cannot say

Q27 The Department of International Development intends to do more than just provide clean drinking water and toilets to poor parts of Africa and Asia.

True

False

Cannot say

On 1st July 2007 the smoke-free law was introduced in England with the aim of protecting employees in their places of work, and the general public in enclosed public places, from the effects of secondhand smoking. These law changes mean that all public transport and work vehicles used by more than one person must be smoke-free, no-smoking signs must be displayed in all smoke-free premises and vehicles, and staff smoking rooms are no longer allowed; staff who want to smoke must go outside. Local councils in England have the responsibility of enforcing the law but it is the legal responsibility of the managers of smoke-free premises and vehicles to make sure people don't smoke. Individuals can be fined or prosecuted for breaking the law and employers can be fined if they do not display the no-smoking signs or if they allow smoking to continue on their premises.

Q28 Second hand smoking can cause lung cancer and other respiratory diseases.

True

False

Cannot say

Q29 The smoke-free law had the public's welfare in mind.

True

False

Cannot say

Q30 It is no longer legal for smoking rooms to be provided for employees inside buildings.

True

False
